Date of Birth: 06/02/1995

Gifted and versatile software engineer with a solid background in software development and a specialization in UI/UX design. Proficient in **Figma, HTML, CSS, Bootstrap, PHP, Python, React.js**, and **Adobe XD**. Experienced in building responsive, user-focused interfaces and interactive applications to enhance the overall user experience. Skilled in both front-end and back-end development with strong problem-solving abilities. Looking to contribute my expertise to a leading tech firm. Proven track record of delivering high-quality software solutions and collaborating with cross-functional teams. Seeking a software engineer role to leverage my technical skills and creative mindset.

Professional Summary

Experienced Software Engineer with **6 years** of expertise in full software development life cycle, from concept to delivery of next-generation web applications and customizable solutions. Strong proficiency in modern web development technologies, including **HTML5, CSS, Bootstrap 4, JavaScript**, and **React.js**. Demonstrated ability to collaborate with cross-functional teams to deliver advanced software solutions using agile methodologies. Expertise in **HTML, Bootstrap, Adobe XD**, and **Photoshop** for **UI/UX design**. Skilled in **JavaScript** and **jQuery** frameworks with a proven track record of maintaining and enhancing website functionality, resolving bugs, and ensuring seamless user experiences. Successfully completed multiple freelance software development projects, showcasing high-quality deliverables.
